Inspector Observations:

This investigation is in response to a complaint (CO0069161).

-Observed two small, live cockroaches on the stainless-steel panel to the right of the steam table at the cook line. Cockroaches crawled back in between the wall and the panel and in between the steam table and wall. Cover and protect all food from potential contamination. Eliminate all cracks and crevices between the stainless-steel panel and the wall. Clean and sanitize the steam table area and side of the equipment.

-Observed an adult live cockroach and multiple small, live cockroaches inside the lower part of the wall where there are broken cove base tiles underneath the steam table. Repair the cove base tiles and seal cracks and crevices in between the tiles. RegROUT between the tiles below the steam table to prevent food and water debris build up.

-Observed dead bugs on the light cover above the cook line. Clean the light cover and ensure dead vermin is discarded and areas are cleaned. Clean and sanitize the floors, walls, ceilings.

-Observed a clogged floor drain near the steam table and a clogged floor drain below the ice machine. The waste water was not overflowing from the floor drain. Contact a plumber to ensure waste water is properly drained. Clean and sanitize the floor drains.

The facility is closed due to a cockroach infestation. Facility has contacted pest control services. Observed pest control services from Integrity Pest Elimination with a service date of 5/7/2019. The facility will be reopened when no evidence of active infestation can be found. Contact the Department of Environmental Health at 951-461-0284 to schedule a reinspection. A reinspection is tentatively scheduled for 5/29/19.
